[LinkedIn](#)

I am a fresher with knowledge in SQL, Frontend, and Full Stack Development.

I can build web pages using HTML, CSS, JavaScript, and connect them with databases using SQL.

I am eager to learn new technologies, work on real projects, and grow as a developer.

## Experience

### Internship Full Stack Java

Jul 2023 - Dec 2023

- Completed training/projects in Frontend (HTML, CSS, JavaScript), Backend (Java), and Databases (SQL).
- Built simple web pages and small applications with database connectivity.
- Gained hands-on knowledge of Full Stack Development through practice and mini-projects.
- Collaborated with team members to design responsive user interfaces, improve application performance, and deliver real-world projects within deadlines.

### Course UI/UX Designing

Jul 2024 - Dec 2024

- Completed training in user interface and user experience design, covering wireframing, prototyping, user research, and responsive design.
- Gained practical knowledge in tools like Figma, and learned to create user-friendly, visually appealing, and interactive designs.
- Learned to design wireframes, mockups, and prototypes for web and mobile apps.
- Gained experience in creating responsive and accessible designs.
- Understood color theory, typography, and design principles for better UI.
- Practiced user research, usability testing, and feedback analysis.
- Worked on real-time projects to design interactive and user-friendly interfaces.
- Improved skills in design thinking and problem-solving.

## Education

### High School

2020

### Anna University

2021 - 2025

- Bachelor of Engineering in Computer Science and Engineering.
